Device Testing

Outside of work

In my free time, I enjoy spending time with family, friends and listening to music. My outside goals include drawing and watching movies.

Selected relevant project experience

GlaxoSmithKline and Haleon

Cognizant

eLearning modules
Functional &
Accessibility testing

- Testing of complete application on Desktop browsers and iPad devices.
- Reviewing the eLearning functionality and testing the eLearning modules based on the accessibility configuration using screen reader JAWS/NVDA as per WCAG 2.1 AA standards.
- Finding all the functionality and accessibility issues and logging quality bugs. Attaching proper screenshots or video describing the issues.
- Defects were tracked, reviewed, analyzed and compared.
- Regression testing was conducted to ensure that bug fixes are working properly and that issues fixed do not impact other areas of the application.

Cigna

Cognizant

Software Application
testing

- Performed functional testing on various modules on different browsers and mobile devices.
- Involved in story analysis, test plan, scenarios, test cases, and data as per requirement and updated in the Rally.
- Performed test execution, defect tracking and management in Rally.
- Bug revalidation and regression testing.
- Worked with developers to assess program capabilities, features, and testing requirements.
- Participated in the daily status meetings with clients.
- Used SoapUI and JSON services to check the API.
- Used Perfecto, Browser stack for the mobile testing.
